ABOUT ME

I am a fourth-year student in Computer Systems and Network Engineering with a specialization in UX/UI design, passionate about creating web interfaces that combine functionality with aesthetics. My experience includes using Figma and initial knowledge in frontend development. Additionally, I develop digital content such as templates and guides, expanding my ability to communicate visually. Motivated by continuous learning, I seek opportunities to apply and enrich my UX/UI design skills and contribute to innovative projects.

PROFESSIONAL HISTORY

PARTICIPANT IN UNIVERSITY PROJECTS - GERARDO BARRIOS UNIVERSITY

- Project Leadership: Coordination and management of university projects, excelling in leadership skills and teamwork.

- Development and Design: Creation of web interfaces using HTML, CSS, and Bootstrap, complemented with design in Figma, focusing on usability and user experience.

- Communication: Effective interaction with multidisciplinary teams for the presentation of solutions and the integration of feedback into continuous improvement processes.

ACADEMIC HISTORY

HIGHLIGHTED UNIVERSITY PROJECTS:

- ECO AI: Creation of an AI system for automatic waste classification, focused on improving environmental management.

- UGBSTORE: Development of an online catalog for the university store, optimizing accessibility and user experience.

- Virtual Assistant for Chronic Patients: Design of a web application that provides assistance and monitoring to patients with chronic diseases.

Currently:
- Study Habits Application: Design of a web and mobile solution to encourage healthy eating habits in students, considering their academic routines.
